UKEPLAN FOR 7. KLASSE

UKE 45

Navn:_____

TIRSDAG	ONSDAG	TORSDAG	FREDAG	LÆRINGSMÅL:
Norsk: Gjør side 2 av øveordarket og lær hva de betyr.	**Norsk:** Les arket "Dritbra frø lurer møkkbille" og svar på spørsmålene. **Matte:** Gjør arket Addisjon av brøk.	**English:** Read the text on the back and write answers to the questions in your workbook. Use full sentences.	**FRI** **pga planleggingsdag for lærerne**	**Norsk:** Jeg kan stave øveordene og vet hva de betyr. **Matte**: Jeg kan addere brøker med lik nevner. **English:** **Naturfag**: Vi fortsetter med temaet om jordskorpa som rører på seg. **Krle:** Filosofi. Vi reflekterer over eksistensielle spørsmål knyttet til menneskets levesett og levekår og klodens framtid. **Livet og sånt:** Temaet er kropp. Vi snakker om hvordan man lytter til, tar vare på, setter pris på og setter grenser for kroppen sin.
Norsk øveord	**Fremmedord:** **abonnent, annonse, initiativ, profesjonell, kollektiv, appetitt, arrestere, arrangere.**			
Engelske gloser	**Australia is a very big island -** Australia er en veldig stor øy **The emu is the largest bird -** Emuen er den største fuglen			

INFORMASJON:

Denne uka er det elevsamtaler. Konferansetidene neste uke er sendt på visma.

Til fredag er det fri for elevene. Vi lærerne skal ha planleggingsdag.

Hilsen Tone Monica Bjørkelid, tone.monica.bjorkelid@kristiansand.kommune.no, 99536235

Sett: _____

The giant island of Australia

Australia is a very big island. It’s so big that it’s also a continent.

When you think of Australia, do you think of kangaroos? You should! There are about 35 million kangaroos in Australia. They can grow one-and-a-half metres tall, run 60 kilometres an hour and jump two metres into the air without a trampoline.

Kangaroos live only in Australia, except for the ones you find in zoos. Do you want to know a fun fact? Kangaroos spit on their wrists to cool themselves down in the hot desert sun!

Another animal that only lives in Australia is the koala. They live in trees called 'home trees'. Koalas love to munch on eucalyptus leaves. Every year, there are bushfires in Australia. The last one was so big and lasted so long that it burned down huge areas of the koalas’ habitat. Many of them have been left homeless. Many were badly burnt and many of them died. People who found injured koalas took them to the koala hospital, where they were treated for their burns and cared for until they could be returned to the wild.

The emu is the largest bird in Australia and the second largest bird in the world after the ostrich. The emu has wings, but cannot fly. Luckily for the emu, it can run very fast, up to 50 kilometres an hour! So what is so special about their wings? The emu uses them as tiny air conditioners to cool itself down. A lot better than spitting!

Write the answer to these questions in your workbook:

1. How do kangaroos and emus cool themselves down?
2. What is the koala's favourite food?
3. Which of these animals do you like best, and why?
