Learning technology for students in Kristiansand

All students in the Municipality of Kristiansand are equipped with a personal digital device. This may be a chromebook, an iPad or a PC, incl charger and protective sleeve, and is intended for school work.

Normal rules of order and compensation apply all student devices

Be careful!

The device should be kept in its sleeve when not in use.

No drinks in the school bag!

Handle school bag with care! Keep dry and safe.

Google for education.

All students have access to a G-suite for Education account. See more here:
https://edu.google.com/intl/no_ALL/products/gsuite-for-education

Technology for learning

The device is intended for school work only. It is not intended to be a private entertainment center or a gaming device. It is for the pupils use only.

Damage or loss

In case of damage to the device, the Norwegian Damages Act applies. Carelessness and vandalism may lead to liability. The Head of school is responsible for all follow up.

Smart charging

Bring your device fully charged every day.

Only use original charger in a earthed outlet.

Charge on a fire proof surface, do not cover while charging.

Charge the device during the daytime, never at night.

Being smart online

While at school the students are protected by an internet filter which stops most porn and hate sites, as well as other unwanted material.

At home it is up to the parent(s)/guardian(s) to safeguard their internet access. Most home routers can do this. See your ISP for more details.

No matter which filter you use, adults should show an interest in their children's intenet use and online life. The most important filter is the one between our ears. Healthy attitudes and wise choices apply in the digital world as well..

All digital devices are the property of the Municipality of Kristiansand, and are subject to device management. This means that there are limitations as to who can access the devices and what can be installed on them.
